#### **Claims pending**

- Before this Amendment: Claims 1-20.
- After this Amendment: Claims 20

**Non-Elected, Canceled, or Withdrawn claims:** Claims 1-19

**Amended claims:** Claim 20

**New claims:** None.

---

### **Claims:**

#### **1 - 19. (Canceled)**

**20. (Currently Amended)** A system, comprising:

    a processing unit;  
    one or more input devices communicatively connected to the processor for generating one or more input signals;  
    a memory module associated with the processor, the memory module comprising:  
        a speech interaction module for receiving spoken commands from a user and generating computer-executable instructions from the spoken commands,

wherein the computer-executable instructions generated are recorded in an operation log; and

a speech interaction cancellation module for receiving an input signal from the one or more input devices and terminating a speech interaction session in response to the input signal,

wherein terminating the speech interaction session comprises reversing any operations performed during the speech interaction session by undoing the operations recorded in the operation log ~~on an operation-by-operation basis.~~
